

José Carlos Del Valle

Senior Data Scientist | End-to-End ML & Experimentation

Mexico City, Mexico [LinkedIn](#) [GitHub](#)

PROFESSIONAL SUMMARY

Senior Data Scientist with end-to-end ownership across statistical modeling, machine learning, experimentation, data pipelines, validation, deployment and monitoring. Builds Python, SQL and PySpark solutions on complex data, translates quantitative findings into operational decisions, and supports teams through technical review, documentation and knowledge transfer.

EXPERIENCE

BBVA México

April 2024 – Present

Senior Data Scientist

- Reduced cases reviewed per relevant finding from 450 to 34 through hybrid fraud-prioritization logic, materially improving investigation efficiency with auditable rules and ML workflows.
- Improved detection rate from 19% to 37% through hybrid rules, anomaly detection and statistical validation while reducing false positives.
- Strengthen delivery quality through code review, distributed-pipeline refactoring, monitoring, technical presentations, documentation, demos and peer guidance across analytics and applied GenAI work.

BBVA México

May 2022 – March 2024

Data Scientist — Associate

- Built SQL/PySpark segmentation, eligibility and prioritization workflows for Next Best Offer and commercial releases; evaluated interventions with treatment/control and placebo analysis to support causal inference and campaign decisions.

BBVA México

May 2021 – April 2022

Data Scientist — Analyst

- Adapted ML and ETL workflows for cash-demand forecasting and ATM/branch strategy using clustering, market-potential analysis and recurring-data automation.

Management Solutions

October 2017 – May 2021

Senior Data Scientist, Jul 2020–May 2021 · Data Specialist (Assistant II), Nov 2019–Jul 2020 · Data Specialist (Assistant), Oct 2017–Mar 2019

- Contributed to a PySpark/MicroStrategy clarification-prioritization model and dashboard associated with savings of up to MXN 1.8M per quarter and capacity growth from 25 to 120 cases per analyst per day.
- Supported Salesforce and data-lake-to-warehouse migrations through business-rule translation, A/B testing and reconciliation; earlier designed insurance fraud-monitoring KPIs using PCA, outlier detection and R.

Professional Development

2019

Ireland exchange, English development and early R/open-source statistical work, including FitUltD.

EDUCATION

Master's in Data Science — Universidad Panamericana, 2023–2024 · 9.6/10

Bachelor's in Actuarial Science — Universidad Nacional Autónoma de México (UNAM), 2013–2018

SKILLS

Python • SQL • PySpark • Machine Learning • Statistical Modeling • Experimentation & Causal Inference • Feature Engineering • Data Pipelines / ETL • Model Validation & Monitoring • R • Generative AI / LLM Application Design

CERTIFICATIONS

GenAI Aplicado: ChatGPT & Gemini — Colegio de Matemáticas Bourbaki (2026) · Professional Scrum Master I — Scrum.org (2020) · CS50's Introduction to Computer Science — HarvardX/edX (2020)
